3. I intend to continue the review procedures of the 40 Committee. I want to emphasize the importance I place on a thorough analysis of these activities, balancing potential gain against potential costs and risks.
4. As I said in my press conference of September 17, these activities are conducted in the national interest of the United States. I do not intend to yield to public pressures on this subject, which come from only a small minority. We will continue to do what is right for the country.
